* Availability may be limited in some partner networks.

YOUR ADVANTAGES

- ✓ Free professional hardware
- ✓ Installation on site
- ✓ Exclusive business options

BUSINESS OPTIONS

Add exclusive options to your Business Internet or Business Package subscription.

Internet Backup

Internet Backup is a simple solution for business users who want to be on the safe side with their Internet connection. If the cable network fails, the cable modem automatically connects to the 4G mobile network. When the cable network is available again, the modem automatically switches back to standard operation.

Advantages:

- ✓ Continuous operation of Internet service
- ✓ Automatic change between cable and mobile network
- ✓ Simple installation

Price: CHF 10 per month

This option is available for all Business Internet and Business Package subscriptions, apart from Business Internet 1000 and Business Package 1000, and can only be used on a modem with a dynamic IP (DHCP).

WLAN Powerline

The WLAN Powerline Set amplifies the signal over existing power supply lines and extends the range of your WLAN. Plug the Powerline adapter into a socket near the cable modem and connect the two devices with a LAN cable. Then plug the extender into a power outlet in the room where you want to receive a stronger signal – and you have a new hotspot. The Business Wifi option is recommended for a significantly higher range over very large areas and multiple floors.

Advantages:

- ✓ WLAN range extension
- ✓ Operation of up to 3 additional hotspots possible
- ✓ Simple installation (plug & play)

	Business Package 300 & 1000 Business Internet 300 & 1000	Business Package 100 Business Internet 100
WLAN Powerline Set (1 adapter and 1 extender)	CHF 0	CHF 99/month

Fixed IP addresses

An IP address is a unique identification address assigned to each device which is connected to the Internet. Unlike dynamic IP addresses, fixed (or static) IP addresses do not change. Fixed IP addresses are used, for example, for operating your own e-mail or web servers or for remote servers, remote maintenance access or VPN constructs.

1 fixed IP address	CHF 20/month
5 fixed IP addresses	CHF 40/month
13 fixed IP addresses	CHF 60/month
29 fixed IP addresses	CHF 80/month

Business Wifi and Business Wifi with Guest Access

If you want to provide WLAN in larger areas and over multiple floors, additional wireless access points connected to the existing LAN sockets are the ideal solution. They have a significantly higher range and bandwidth performance than the WLAN module in the cable modem. You will receive 2 WLANs with SSIDs and passwords. If required, up to 6 SSIDs can be configured. Public WLANs with guest access are available with the Business Wifi with Guest Access option.

Advantages:

- ✓ Scalable, powerful WLAN
- ✓ Multiple access points can be connected as one large WLAN
- ✓ Separate sensitive networks and prioritise the bandwidth for performance-based areas

	Business Wifi	Business Wifi with Guest Access
1 Access Point	CHF 35/month	CHF 40/month
2 Access Points	CHF 70/month	CHF 80/month

A return-path compatible cable connection from UPC Switzerland LLC or one of our partner networks is required for an Internet, telephone or digital TV connection. If the cable connection is billed by a UPC partner network, this will be taken into account in the form of a credit note. The modem will be provided free of charge for the duration of the contract. All prices are quoted exclusive of VAT. Prices and offers subject to change.
