

PREMIUM VOICE ISDN-PBX / IP-PBX

Telephone solutions that connect you to the world.

With the Premium Voice ISDN-PBX and Premium Voice IP-PBX voice services, you connect your company's traditional ISDN telephone system or your modern IP telephone system to the telephone network. UPC Business supports basic (BRI) and primary connections (PRI) for the connection of ISDN telephone systems.

The integration of telephony into the data network is coming on in leaps and bounds thanks to VoIP (Voice over IP). Voice over IP is more flexible, practical and cost-effective than ISDN. With suitable measures, IP telephony already meets professional standards as far as quality, security and reliability are concerned. We have 15 years' experience with VoIP and offer you outstanding service and competent support during migration.

- Transportation of voice services via a dedicated, private IP connection (VPN; not via the public Internet)
- Connection does not require a firewall
- Proactive monitoring of the connection
- Support for G.711 and T.38
- Number porting
- Individual set-up of backup and emergency routing scenarios
- CLIP special arrangement
- AOC-D for ISDN telephone systems (call charge information during call)
- ISDN remote access (remote maintenance for ISDN telephone systems)
- With Business Flatrate or attractive call rates

YOUR ADVANTAGES

- ✓ Connect your existing system via a private network to the telephone network
- ✓ Experience you can rely on since 2003
