

BUSINESS VOICE IP-PBX FOR MICROSOFT TEAMS

Crystal clear, safe telephony
in the Microsoft Cloud.

Those who communicate in the Microsoft Cloud with Microsoft Teams have a number of functions available to them. With Business Voice IP-PBX for Microsoft Teams, we provide the connection to the public telephone network.

When the Microsoft Cloud is connected to UPC Business's highly available telephone platform, telephony functions from Microsoft Teams can be used. The platforms' communication is encrypted.

The configuration of Microsoft Teams is done by certified Microsoft partners. Selected partners of UPC Business are available for support.

With the Backup Rerouting option, it is possible to plan smooth migration for companies. For example, mobile employees can be migrated to Microsoft Teams, while the stationary basis continues to use the existing equipment (such as the local telephone system, DECT systems).

Office 365 licence requirements:

- Licence E3 + Phone System
- Licence E5
